Career Objective

A final year Computer Science and Engineering (CSE) student seeking an opportunity to apply my skills in programming, data analysis, and problem-solving to contribute to innovative projects and gain practical experience in the tech industry. Passionate about leveraging technology to solve real-world problems and eager to collaborate with a dynamic team.

Education

- Bachelor of Technology (B.Tech.) - Computer Science and Engineering (Artificial Intelligence and Machine Learning)
~Oct 2021 – Aug 2025(Expected) ~ United College of Engineering and Research, Naini, Prayagraj, UP
Secured 7.8 sgpa (upto 6th semester)
- 12th (Intermediate) – Science
~2021 ~D.A.V. Public School, Barora, Dhanbad, Jharkhand
Secured 90% marks
- 10th
~2019 ~D.A.V. Public School, Barora, Dhanbad, Jharkhand
Secured 89.8% marks

Key Projects

- MNIST Handwritten Digit Recognition ~July 2024
 - Developed a neural network with ReLU and Softmax activation functions.
 - Achieved 95.7% accuracy and 0.16 loss over 1000 iterations.
 - Deployed the model on the web using Flask.
- Login & Signup System ~August 2024
 - Created a secure authentication system with Django and MongoDB.
 - Designed dynamic and responsive login/signup pages using HTML and CSS, ensuring seamless user interactions.
- Chess (PvP) ~November 2023-January 2024
 - Designed and implemented a chess game supporting player-vs-player.
 - Leveraged Pygame for game mechanics and OOP principles to structure code efficiently.
 - Enhanced user experience with intuitive gameplay features.
- House Price Prediction ~September 2023
 - Used housing datasets to train and evaluate predictive models such as Linear Regression, Random Forest, and XGBoost.
 - Achieved 96% accuracy by optimizing hyperparameters and employing feature engineering techniques.
- 7Up 7Down Game ~July 2022
 - Developed a Tkinter-based game leveraging NumPy for fairness algorithms.

Skills

- Programming Languages: Python (used for building ML models and GUI development), Java (Basic).
- Data Analysis & Visualization Tools: Numpy, Pandas, Matplotlib, Seaborn.
- Machine Learning Frameworks: Scikit-learn (for predictive modeling and data analysis), TensorFlow (for neural network training).
- Web Development Frameworks: Flask, Django.
- Database Management Systems: MySQL, MongoDB.
- Strengths: Problem-Solving Skills, Critical Thinking, Team collaboration.

Summer Trainings

- Python Training: ~June 2022
 - Gained practical experience in data structures and GUI development using Tkinter.
- Machine Learning Basics: ~August 2023
 - Built predictive models using Scikit-learn and practiced working with real-world datasets.
- Neural Networks: ~June2024 - July 2024
 - Achieved high accuracy in MNIST digit recognition by implementing backpropagation and cross-entropy loss functions.
